OTTAW

PREFACE.

For the British Empire the year 1887 is a marked year. It is the "Queen's jubilee year." For Canada, it is also notable as the 20th year of Confederation.

It is a year whose statistics form the standard for comparison with the past. It will be the year of comparison for the future.

An effort has, therefore, been made to collect statistics suggestive of the changes, and illustrative of the development, in Canada during the period of Confederation. The first instalment is herewith given to the Canadian people, in the hope that, encouraged by the substantial progress which marks the years of the childhood of the Dominion, they will be strengthened in their determination to make the manhood of their country even better in fulfilment of its destiny than the early period has been bountiful in promise.

GEORGE JOHNSON.

OTTAWA.
